Work Experience

Microsoft

Xbox Refunds Associate | Remote

March 2020—Present

- Analyze customer data for financial troubleshooting, refund eligibility and fraud prevention.
- Independently create a data parsing tool using Python that cleans bulk request data to reduce case time.
- Independently automate workflow using Python and automation libraries further reducing case time.
- Create tutorials for prototyping tools and train colleagues in the Python programming language.

Microsoft

Product Advisor | Redmond, WA | Bellevue, WA

May 2018—March 2020

- Deliver workshops and personal trainings to educate and inspire clients.
- Generate business leads to grow sales pipeline and generate recurring revenue.
- Troubleshoot and resolve common technical problems.
- Lead hands-on demos of Microsoft products to create new fans and drive excitement in store.

Featured Projects

[MIT Course View Count Analysis](#)

March—June 2020

Collected, cleaned, and visualized YouTube MIT course view count data to gain insight on course completion.

Technologies: Python, pandas, matplotlib, YouTube Data API, JSON, Data Analysis

[Cryptocurrency Lottery](#)

2018—2020

Built a text based lottery game to demonstrate the security of cryptocurrency private keys.

Technologies: Python, Ethereum Blockchain API, Cryptography, Object-Oriented Programming

[Attacks on Apéry's Constant](#)

Continuous

Ongoing attempt to solve a 375 year-old problem in mathematics using novel attack vectors and Python.

Technologies: Python, sympy, LaTeX, Number Theory, Mathematical Analysis

Education

Bachelor of Arts in Communications | University of Washington

2014—2017

Coursework included advanced public speaking and a concentration in mathematics.

Skills

Programming Languages: Python (numpy, pandas, matplotlib, scipy, sympy)

Database Management: SQL, JSON

Web & Markup: Google Analytics, HTML, CSS, LaTeX

Productivity: Microsoft 365, Apple iWork, Google G Suite

Languages: English, Punjabi
